Public health and tobacco control - 2018

This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Tobacco Control Policy in the Netherlands 2018-05-15 Marc C. Willemsen Governments have known since the 1960s that smoking results in irreversible health damage. This open access book examines why governments have done so little to combat this when they have been aware of the problem and its solutions for decades. What are the strategies and decisions that make a difference, given that policy environments are often not conducive to change? Taking the Netherlands as an example, this book helps to understand the complex policy process at the national level and why it so often appears irrational to us. It is the most sophisticated analysis of tobacco control policy to date, applying insights from political sciences to the field of tobacco control.

Immigrant Student Achievement and Education Policy 2018-03-21 Louis Volante This book examines immigrant student achievement and education policy across a range of Western nations. It is divided into 3 sections: Part 1 introduces the topic of immigrant student achievement and the performance disadvantage that is consistently reported across a range of international jurisdictions. Part 2 then presents national profiles from scholars in ten countries (England, Germany, Italy, Sweden, Finland, Netherlands, Republic of Ireland, Canada, Australia, and New Zealand). These educational jurisdictions were selected because they represent a range of Western nations engaged in large-scale reform efforts geared towards enhancing their immigrant students’ achievement. Each of the national profiles provides a brief overview of the evolution of the cultural composition of their respective school-aged student population; explains the trajectory of achievement results in non-immigrant and immigrant student groups in relation to both national and international large-scale assessment measures; and discusses the effectiveness of policy responses that have been adopted to close the achievement gap between non-immigrant and immigrant student populations. It also examines the relationships between education policies and immigrant student achievement and discusses how education policies have evolved across various cultural contexts. In conclusion, Part 3 analyzes cross-cultural approaches designed to address the performance disadvantage of immigrant students and proposes future areas of inquiry stemming from the national profiles. The book offers insights into a diverse cross-section of nations and policy approaches to addressing the performance disadvantage.

Small Firms in Tourism 2013-06-17 Rhodri Thomas This book provides a varied collection of recent research relating to small businesses in tourism. In doing so it reflects the eclecticism of interest and method associated with this under-researched and under-theorised area of investigation. Topics range from the potential contribution of small firms to achieving social or economic goals to understanding more about business performance and growth. As is common in tourism research, disciplinary boundaries are routinely transgressed in the interests of gaining greater illumination. Insights from a variety of countries are offered, sometimes as a result of trans-national collaboration initiated specifically for this book.

Global Climate Change Impacts in the United States 2009-08-24 U.S. Global Change Research Program Summarizes the science of climate change and impacts on the United States, for the public and policymakers.

The Hockey Stick and the Climate Wars 2013-10-01 Michael E. Mann The ongoing assault on climate science in the United States has never been more aggressive, more blatant, or more widely publicized than in the case of the Hockey Stick graph—a clear and compelling visual presentation of scientific data, put together by Michael E. Mann and his colleagues, demonstrating that global temperatures have risen in conjunction with the increase in industrialization and the use of fossil fuels. Here was an easy-to-understand graph that, in a glance, posed a threat to major corporate energy interests and those who do their political bidding. The stakes were simply too high to ignore the Hockey Stick—and so began a relentless attack on a body of science and on the investigators whose work formed its scientific basis. The Hockey Stick achieved prominence in a 2001 UN report on climate change and quickly became a central icon in the “climate wars.” The real issue has never been the graph’s data but rather its implied threat to those who oppose governmental regulation and other restraints to protect the environment and planet. Mann, lead author of the original paper in which the Hockey Stick first appeared, shares the story of the science and politics behind this controversy. He reveals key figures in the oil and energy industries and the media front groups who do their bidding in sometimes slick, sometimes bare-knuckled ways. Mann concludes with the real story of the 2009 “Climategate” scandal, in which climate scientists’ emails were hacked. This is essential reading for all who care about our planet’s health and our own well-being.

Jan Hendrik Oort 2019-07-16 Pieter C. van der Kruit This book is the first thorough and overdue biography of one of the giants of science in the twentieth century, Jan Hendrik Oort. His fundamental contributions had a lasting effect on the development of our insight and a profound influence on the international organization and cooperation in his area of science and on the efforts and contribution of his native country. This book aims at describing Oort’s life and works in the context of the development of his branch of science and as a tribute to a great scientist in a broader sense. The astronomer Jan Hendrik Oort from the Netherlands was founder of studies of the structure and dynamics of the Milky Way Galaxy, initiator of radioastronomy and the European Southern Observatory, and an important contributor to many areas of astronomy, from the study of comets to the universe on the largest scales.

Consuming Habits 2014-04-08 Jordan Goodman Covering a wide range of substances, including opium, cocaine, coffee, tobacco, kola, and betelnut, from prehistory to the present day, this new edition has been extensively updated, with an updated bibliography and two new chapters on cannabis and khat. Consuming Habits is the perfect companion for all those interested in how different cultures have defined drugs across the ages. Psychoactive substances have been central to the formation of civilizations, the definition of cultural identities, and the growth of the world economy. The labelling of these substances as 'legal' or 'illegal' has diverted attention away from understanding their important cultural and historical role. This collection explores the rich analytical category of psychoactive substances from challenging historical and anthropological perspectives.

Master of Galactic Astronomy: A Biography of Jan Hendrik Oort 2020-12-28 Pieter C. van der Kruit This accessible and entertaining biography chronicles the life and triumphs of astronomer Jan Hendrik Oort, who helped lay the foundations of modern astronomy in the 20th century. The book puts into context some of Oort’s most significant achievements, including his discovery that the Milky Way rotates, as well as his famous hypothesis that our Solar System is surrounded by a reservoir of comets — now simply known as the Oort Cloud. Written by Oort’s former student, this fascinating story also delves into Oort’s pivotal role in the foundation of major astronomical facilities, including radio telescopes in the Netherlands and the European Southern Observatory (ESO), which now operates the most successful astronomical observatories in the world. The book draws extensively on new archival research through the Oort Archives, along with personal reminiscences by Oort’s son and astronomer-grandson, to paint a more detailed picture of Oort’s life not just as an astronomer, but also as a husband, father, and citizen. The strong public interest in comets triggered by the Rosetta mission to comet 67P/Churyumov-Gerasimenko and the recently discovered interstellar comet in the Solar System make this book particularly timely.

de Swiet’s Medical Disorders in Obstetric Practice 2010-12-17 Raymond Powrie Pregnancy affects the physiology of women as their bodies adapt to the growing life within them; but how does this affect how you manage general, or pre-existing medical complaints? How do you differentiate the effects of pregnancy from genuine medical conditions? What are the effects of the ‘standard’ treatments on the growing fetus? What about breastfeeding? In this brand-new edition of de Swiet’s Medical Disorders in Clinical Practice, expert physicians present the best evidence and practical wisdom to guide you and your patients through their pregnancy and illness, to a successful birth and early motherhood. Using a combination of algorithms, years of experience and an evidence-based approach, this book will help you to: Diagnose difficult to identify conditions during pregnancy Effectively prescribe for pregnant and lactating women Overcome the challenges of imaging, anaesthesia and critical care for pregnant women de Swiet’s assists you in navigating the many challenges pregnancy presents for both the patient and physician.

Wearable Robotics: Challenges and Trends 2021-07-01 Juan C. Moreno This book reports on advanced topics in the areas of wearable robotics research and practice. It focuses on new technologies, including neural interfaces, soft wearable robots, sensors and actuators technologies, discussing industrially and medically-relevant issues, as well as legal and ethical aspects. It covers exemplary case studies highlighting challenges related to the implementation of wearable robots for different purposes, and describing advanced solutions. Based on the 5th International Symposium on Wearable Robotics, WeRob2020, and on WearRacon Europe 2020, which were both held online on October 13-16, 2020, the book addresses a large audience of academics and professionals working in for the government, in the industry, and in medical centers, as well as end-users alike. By merging together engineering, medical, ethical and industrial perspectives, it offers a multidisciplinary, timely snapshot of the field of wearable technologies.

Virtual and Remote Control Tower 2016-05-13 Norbert Fürstenau The interdisciplinary research and development work carried out in the last ten years which is presented in this book aimed at replacing the conventional airport control tower by a new “remote tower operation” work environment (RTO) which should enhance work efficiency and safety and reduce costs. This revolutionary human-system interface allows for remote aerodrome traffic control without a physical tower building and enables the establishment of remote airport traffic control centers (RTC) of which each may serve several airports from a central location.

Identity and Image 2006 Jutta Vinzent "This book explores the image and identity of émigré painters, sculptors and graphic artists from

Nazi Germany in Britain between 1933 and 1945. It focuses on a neglected field of Exile Studies, that of exiled artists in Britain. Methodologies used in this study have been developed by Exile Studies and History of Art, but also by Postcolonialism, scholars of which usually apply their ideas to the Afro-Asian emigration of the second part of the twentieth century. Thus this study represents methodologically a new way of looking at the emigration from Nazi Germany. Identity and Image is divided into five chapters: After an introductory Chapter One (historiography of the topic, methodology of the study, structure of the book), Chapter Two establishes socio-political patterns of emigration and provides an historical framework for Chapters Three and Four, which concentrate on the image and identity of the refugee artist, the former based on written sources and the latter on visual material. In detail, Chapter Three analyses the British image of the refugee artists and their works on the one hand and the émigrés’ self-representations on the other, the latter exemplified by refugee organisations (the Free German League of Culture/Freier Deutscher Kulturbund, the Austrian Centre, the Anglo-Sudeten Club and the Czech Institute) and institutions founded by émigré artists (Jack Bilbo’s Modern Art Gallery and Arthur Segal’s Painting School). Chapter Four examines the works produced in internment and those exhibited and produced for the refugee organisations discussed in Chapter Three. Chapter Five discusses the results of this study in the light of three postcolonial concepts: diaspora communities, the notion of home and the gendered identity of the refugee. The appendix lists all painters, sculptors and graphic artists from Nazi Germany in Britain with biographical details. Apart from visual and written sources discussed for the first time, there are two major results of the study: First, although the artists were united as refugees, this unity did not lead to a unity in art - ""refugee art"" is a construction put forward by the British press and the refugee organisations, particularly the Free German League of Culture. Second, contrary to claims that modern art was international and formed a universal unity that ""transgressed"" nationality, neither the West/Europe nor modernism form unities; instead, in the 1930s and 1940s, cultures in Europe constructed conceptions of other European cultures on the basis of nation-state identities.

Climate Change Denial 2013-05-13 Haydn Washington Humans have always used denial. When we are afraid, guilty, confused, or when something interferes with our self-image, we tend to deny it. Yet denial is a delusion. When it impacts on the health of oneself, or society, or the world it becomes a pathology. Climate change denial is such a case. Paradoxically, as the climate science has become more certain, denial about the issue has increased. The paradox lies in the denial. There is a denial industry funded by the fossil fuel companies that literally denies the science, and seeks to confuse the public. There is denial within governments, where spin-doctors use 'weasel words' to pretend they are taking action. However there is also denial within most of us, the citizenry. We let denial prosper and we resist the science. It also explains the social science behind denial. It contains a detailed examination of the principal climate change denial arguments, from attacks on the integrity of scientists, to impossible expectations of proof and certainty to the cherry picking of data. Climate change can be solved - but only when we cease to deny that it exists. This book shows how we can break through denial, accept reality, and thus solve the climate crisis. It will engage scientists, university students, climate change activists as well as the general public seeking to roll back denial and act.

English Language Education in a Global World 2015 Lap Tuen Wong With English becoming the world’s foremost lingua franca, the pressure to improve English language education (ELE) has been steadily increasing. Consequently, the nature of ELE has changed drastically in the last decade. This has not only brought about a number of changes in the way English is taught and learnt, but it has also led to various innovative practices around the world. As a result, this edited book aims to shed light on the new theoretical and methodological developments in the field of ELE as well as the major issues and difficulties faced by practitioners in different parts of the globe. One very important variable that the book takes into account is the role that English already plays in a particular society since this may affect the views that teachers and students hold of the language. This in turn can significantly influence the way English is taught and learnt in given political, economic and socio-cultural settings. The purpose of this book is therefore to provide a comprehensive overview of the pedagogical methods, policies and problems that underlie English language education in ten different regions across the world, including: the USA, Canada, the UK, Australia, New Zealand, India, Singapore, Japan, China and Hong Kong. In doing so, the different chapters in the book emphasize the importance of responding to linguistic and other forms of diversity in order to develop English language education in a globalized world. This book will be useful for teachers and students of English language, for English language curriculum and materials developers, and for those involved in educational policy-making and language acquisition research. Written by experts in the field, the range of content covered in the book’s chapters will also help policy-makers, researchers and practitioners develop effective English language education practices and policies, and propose solutions to emerging issues in English language teaching and learning in different environments around the world. The newly-developed arguments and concerns pertaining to English language education will serve as future reference for professionals interested in this area of expertise.

Biology of Grasshoppers 1991-01-16 R. F. Chapman Novel Aspects of Insect-Plant Interactions Edited by Pedro Barbosa and Deborah Letourneau This volume represents the forefront of two rapidly advancing areas of ecology: three-trophic-level interactions and the interdisciplinary field of chemical ecology The book focuses on the role of microorganisms as mediators of interactions between insects and plants, providing critical appraisal of studies and suggesting ways to integrate competing hypotheses of insect-plant dynamics. 1988 (0 471-83276-6) 362 pp. Arthropod Biological Control Agents and Pesticides Brian A. Croft Examining the effects of pesticides on predators and parasites and exploring methods for reducing negative impacts of pesticide use, this book focuses on the interaction of pesticides with entomophagous arthropods. It surveys the history of research in the field and discusses susceptibility assessment, lethal, sublethal, and ecological effects of pesticides, and selectivity, resistance, and resistance management. 1990 (0 471-81975-1) 723 pp. Lepidopteran Anatomy, John Eaton This single-source treatment on the anatomy of Lepidoptera provides a detailed exposition of its anatomy plus all its life stages, including the larva and adult forms of the exoskeleton, musculature, organ systems, and specialized structures. As the only thorough examination of the morphology of this insect group, it is an essential acquisition for entomologists, morphologists, and insect physiologists. 1988 (1-05862-9) 257 pp. Integrated Pest Management Systems and Cotton Production Edited by Ray Frisbie, Kamal El-Zik, and L. Ted Wilson The most complete and authoritative work available on the subject, this book brings together information on integrated pest management strategies that are applicable to cotton. It addresses economic, agronomic, and biological factors of pest management and focuses on plant resistance to pests and the genetic rationale for improving plant health. 1989 (0 471-81782-1) 437 pp.

Inclusive Mathematics Education 2019-03-25 David Kollosche The book provides an overview of state-of-the-art research from Brazil and Germany in the field of inclusive mathematics education. Originated from a research cooperation between two countries where inclusive education in mathematics has been a major challenge, this volume seeks to make recent research findings available to the international community of mathematics teachers and researchers. In the book, the authors cover a wide variety of special needs that learners of mathematics may have in inclusive settings. They present theoretical frameworks and methodological approaches for research and practice.

Sex and Drugs Before Rock 'n' Roll 2012 Benjamin Roberts Sex and Drugs Before the Rock 'n' Roll is a fascinating volume that presents an engaging overview of what it was like to be young and male in the Dutch Golden Age. Here, well-known cohorts of Rembrandt are examined for the ways in which they expressed themselves by defying conservative values and norms. This study reveals how these young men rebelled, breaking from previous generations: letting their hair grow long, wearing colorful clothing, drinking excessively, challenging city guards, being promiscuous, smoking, and singing lewd songs. Cogently argued, this study paints a compelling portrait of the youth culture of the Dutch Golden Age, at a time when the rising popularity of print made dissemination of new cultural ideas possible, while rising incomes and liberal attitudes created a generation of men behaving badly.

Time Use Research in the Social Sciences 1999-05-31 Wendy E. Pentland This collection demonstrates the use and variety of applications of time use methodology from multidisciplinary, multinational, and multicultural perspectives. A distinguished roster of contributors from such fields as psychology, occupational therapy, sociology, economics, and architecture examines the complex relationship between human time utilization and health and well-being and evaluates the future of time use analysis as a research tool in the social sciences.

Making Tourism More Sustainable 2005 United Nations Environment Programme. Division of Technology, Industry, and Economics This joint publication from the United Nations Environment Programme and the World Tourism Organization sets out guidance on effective measures to promote sustainable tourism development. Although it is acknowledged that there is not a 'one size fits all', the report highlights the need for co-operation by all key stakeholders within and outside government. Therefore, although the guidance is designed primarily for governments, it is also relevant to public authorities, non-governmental organisations, tourism businesses and trade associations.

Wood Modification Technologies 2021-07-15 Dick Sandberg The market for durable products using modified wood has increased substantially during the last few years. This is partly because of the restriction on the use of toxic preservatives due to environmental concerns, and to lower maintenance cost and time. Furthermore, as sustainability becomes a greater concern, the environmental impact of construction and interior materials is factored in planning by considering the whole life cycle and embodied energy of the materials used. Wood is modified to improve its intrinsic properties, enhance the range of applications of timber, and to acquire the form and functionality desired by engineers without calling the environmental friendliness into question. Wood modification processes are at various stages of development, and the challenges faced in scaling up to industrial applications differ. The aim of this book is to put together the key elements of the changes of wood constituents and the related changes in wood properties of modified wood. Further, a selection of the principal technologies implemented in wood modification are presented. This work is intended for researchers, professionals of timber construction, as well as students studying the science of materials, civil engineering and architecture. This work is not exhaustive, but intends to deliver an outline of the scientific disciplines necessary to apprehend the technologies of wood modification and its behavior during treatment, as well as during its use.

Speaking Our Truth 2017-09-19 Monique Gray Smith ★“Smith’s book is an effort that returns, offering diverse voices that invite the world into the reconciliation experience. Absolutely necessary.”—Kirkus Reviews, starred review Canada’s relationship with its Indigenous people has suffered as a result of both the residential school system and the lack of understanding of the historical and current impact of those schools. Healing and repairing that relationship requires education, awareness and increased understanding of the legacy and the impacts still being felt by Survivors and their families. Guided by acclaimed Indigenous author Monique Gray Smith, readers will learn about the lives of Survivors and listen to allies who are putting the findings of the Truth and Reconciliation Commission into action. Praise for Speaking Our Truth: ★“Smith thoroughly and compassionately examines the history and traumatic aftereffects of Canada’s residential schools…Smith informs without overwhelming or sugarcoating, and she emphasizes the power readers themselves possess.”—Publishers Weekly, starred review ★“Despite the somber topic, Smith consistently empowers readers to be agents of change and provides specific suggestions to take action.”—School Library Journal, starred review ★“Offers a perfect framework for readers actively exploring Indigenous history and current issues. Welcoming, honest, and down to earth, Speaking Our Truth is the tool many Canadians have been waiting for.”—Quill & Quire, starred review

Building an Ecosystem Approach to Aquaculture 2008 Doris Soto 520 Aquaculture growth worldwide involves the expansion of cultivated areas, a higher density of aquaculture installations and farmed individuals, and greater use of feed resources produced outside the immediate culture area. To ensure that such development of the sector does not carry negative impacts on the environment and on parts of society due to weak regulation or poor management, an ecosystem approach for aquaculture (EAA) is encouraged. These proceedings consider aspects relevant for an ecosystem-based management in aquaculture. The document also includes two comprehensive reviews covering the status of brackish, marine and freshwater aquaculture within an ecosystem approach perspective.-Publisher’s description.

From Geoheritage to Geoparks 2015-01-13 Ezzoura Errami This unique book is dedicated to helping promote geoheritage, geoconservation, and geoparks in Africa and the Middle East. Local, regional, global and thematic case studies including a geoheritage toolkit are used to illustrate the scope and depth of geoheritage and highlight some current geoparks and aspiring candidates in Africa, the Middle East, China , Europe,and Australia. This special issue mainly consists of the proceedings of the First International Conference on Geoparks in Africa and Middle East (FIGGAME) held in, El Jadida, Morocco in 2011. The conference, hosted by the Faculty of Sciences of Chouaib Doukkali University, was organized by the African Geoparks Network and the African Association of Women in Geosciences incollaboration with the UNESCO Cairo Office.

Anthropology and Development in a Globalized India 2009-10-02 Eswarappa Kasi The book tries to portray sericulture, as a crop enterprise, and which is emerged as one of the foremost view in the theoretical and methodological understanding in the disciplines of Sociology and Social Anthropology in India. Thus, anthropological analysis of sericulture and its emergence in the development literature gives us an idea of the activity leads to further theoretical and critical studies. Anthropological understanding of the sericulture and its development, thus, is explained thoroughly as studied by the scholars of the different disciplines in across the states of India. Sericulture is best suited to a country like India where manpower and land resources are in surplus. It generates direct and indirect employment in various ways. More and more farmers in India have taken up sericulture activity and which was once confined to only five States, has spread to almost all the States of India. Sericulture also creates gainful employment to women and aged people at homes with minimum risk. Thus, the analysis clearly establishes the importance of sericulture over other crops in the generation of fresh employment opportunities in rural areas. Further, as a predominant sector of rural development, stability is the vital need of sericulture enterprise. In the book, an attempt is made to understand the anthropological/sociological view of development. The book is interdisciplinary in nature and will be useful to scholars and students of Anthropology, Sociology, Economics, Social Work, Rural Development, Gender Studies and Development Studies.

Constructing Destruction 2016-04-14 Trinidad Rico Large-scale disasters mobilize heritage professionals to a narrative of heritage-at-risk and a standardized set of processes to counter that risk. Trinidad Rico’s critical ethnography analyzes heritage practices in the aftermath of the tsunami that swamped Banda Aceh, Indonesia, in 2004 and the post-destruction narratives that accompanied it, showing the sociocultural, historical, and political agendas these discourses raise. Countering the typical Western ideology and practice of ameliorating heritage-at-risk were local, post-colonial trajectories that permitted the community to construct its own meaning of heritage. This book documents the emergence of local heritage places, practices, and debates countering the globalized versions embraced by the heritage professions offering a critical paradigm for post-destruction planning and practice that incorporates alternative models of heritage. Constructing Deconstruction will be of value to scholars, professionals, and advanced students in Heritage Studies, Anthropology, Geography, and Disaster Studies.

Employees and Corporate Governance 2010-12-01 Margaret M. Blair Most scholarship on corporate governance in the last two decades has focused on the relationships between shareholders and managers or directors. Neglected in this vast literature is the role of employees in corporate governance. Yet "human capital," embodied in the employees, is rapidly becoming the most important source of value for corporations, and outside the United States, employees often have a significant formal role in corporate governance. This volume turns the spotlight on the neglected role of employees by analyzing many of the formal and informal ways that employees are actually involved in the governance of corporations, in U.S. firms and in large corporations in Germany and Japan. Examining laws and contexts, the essays focus on the framework for understanding employees’ role in the firm and the implications for corporate governance. They explore how and why the special legal institutions in German and Japanese firms by which employees are formally involved in corporate governance came into being, and the impact these institutions have on firms and on their ability to compete. They also consider theoretical and empirical questions about employee share ownership. The result of a conference at Columbia University,

the volume includes essays by Theodor Baums, Margaret M. Blair, David Charny, Greg Dow, Bernd Frick, Ronald J. Gilson, Jeffrey N. Gordon, Nobuhiro Hiwatari, Katharina Pistor, Louis Putterman, Edward B. Rock, Mark J. Roe, and Michael L. Wachter. Margaret M. Blair is a senior fellow in Economic Studies at the Brookings Institution and author of *Ownership and Control: Rethinking Corporate Governance for the Twenty-first Century* (Brookings, 1995). Mark J. Roe, professor of business regulation and director of the Sloan Project on Corporate Governance at Columbia Law School, is the author of *Strong Managers, Weak Owners: The Political Roots of American Corporate Finance* (Princeton, 1996).

Home Blood Pressure Monitoring 2019-10-31 George S. Stergiou Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and

management of hypertension. Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.
